

Citrix delivers a **seamless approach to remote work** by **enabling workforce productivity and engagement** with **consistent employee experience** during any kind of business disruption.

**Citrix Virtual Apps and Desktops**

**Drive remote access for users in time of crisis**

Provide a high-definition experience on any device and enable remote work quickly. RemotePC capability allows an end user to log on remotely from virtually anywhere to the physical Windows PC in the office.

**Citrix ADC and Citrix SD-WAN**

**Ensure availability of apps and desktops**

Citrix ADC empowers businesses to scale app delivery capacity dynamically and with ease for unforeseen and transient needs with advanced features like clustering, pooled capacity and burst licensing to autoscale in the cloud.

Citrix SD-WAN helps businesses rapidly and dynamically scale virtual apps and desktops in the cloud and connect back to on-backend resources in on-premises data centers.

**Citrix Workspace**

**Remain secure and compliant always**

Citrix Workspace delivers a secure alternative to the traditional VPN appliance-based approach and helps reduce your on-premises footprint. Implement zero trust security with one solution that protects your users, apps, and data with end-to-end contextual access. With Citrix Analytics for Security, security admins gain continuous user risk assessment and mitigation to protect the business after initial login validation.

**Maintain visibility and control**

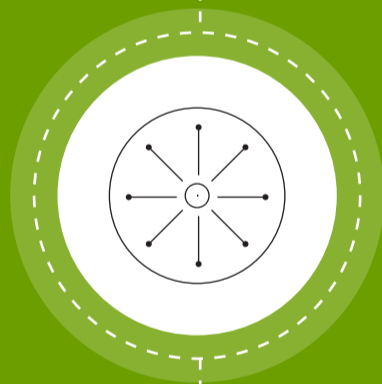

Citrix Analytics service offering enables you to track, aggregate, and visualize key performance indicators of your Citrix environments.

**Scale IT infrastructure during unforeseen demand**

Citrix Access Control, unlike a traditional VPN appliance that needs to be procured, configured, and deployed separately across different locations, has Points of Presence (POP) locations globally and can autoscale to meet any surge in remote worker requirements.

Organizations can scale up or down virtual applications and desktops with Citrix Virtual Apps and Desktops quickly for temporary and remote work use cases. With “autoscale” you can manage workloads and balance costs with user experience.

**Respond faster to restore the ability to service customers**

Citrix Workspace helps you to centrally manage, update and patch business resources located on-premises or in the cloud from one location.

Citrix ADC enables businesses to act faster to shift workloads across clouds with operational consistency. With Citrix ADM, monitor and manage your application delivery with ease.

With **Citrix**, your business continuity model can become your **remote work transformation** and take a more innovative approach. One that’s driven by a **secure and continuous employee experience** that empowers **personal productivity and new innovative models of work** that will **power the future today**.
